

# CAMP ROBERTS REAL PROPERTY DEVELOPMENT PLAN SHORT-RANGE COMPONENT

---

## GENERAL

The Short-Range Component Plan (SRC) focus is on the 6-year Program Objective Memorandum (POM) program cycle to facilitate the strategies for planning the short-term redevelopment of the installation. The time frame of consideration for the SRC is fiscal year (FY) 1999 through FY06. The SRC satisfies immediate planning needs and follows objectives established by the Long-Range Component Plan (LRCP). The SRC can be thought of as those planning actions or objectives that can be implemented in the near term, but also are cognizant of the long-term planning objectives to obtain these planning goals. Projects include specific construction, revitalization, maintenance and repair, and other major program initiatives. The plan shall consider analysis of siting considerations, programming sequences and delays, phasing of larger programs, demolition, and infrastructure needs.

The Camp Roberts SRC focuses on redevelopment of functional capabilities that are critical to the successful operation, management, and enhancement of the major training area (MTA). These capabilities include facilities and real property improvements that directly support training, such as ranges, and also training support capabilities, such as dining and vehicle maintenance.

## OVERVIEW

The SRC relates the specific construction, revitalization, and maintenance and repair project lists to the short-range planning requirements at Camp Roberts and the long-range future development of the installation. The short-range plan emphasizes capital investments in ammunition storage, ranges, range support, dining, training school facilities, and vehicle maintenances. Short-range actions also include an ongoing facility reduction program that targets facilities that absorb excessive amounts of high-priority real property operations maintenance (RPOM) funding. The objective of the facility reduction program is to reduce maintenance expenditures for facilities that are not needed to support the installation mission. The SRC includes high-priority projects as well as RPOM projects that positively impact the installation's capabilities.

## RANGE AND TRAINING AREA

The major emphasis of the SRC is the modernization, expansion, and enhancement of the Camp Roberts ranges complex. The ranges and associated support capabilities are the central training capability provided by Camp Roberts in support of its troop training mission related to weapons qualification, maneuver, and scenario-based unit training at the squad level. Support capabilities are also needed to sustain excellence in range capability and unit training. The goal of these investments is to create a modern and highly-capable range complex that can sustain high-quality training scenarios in response to evolving doctrinal and unit requirements.

Introduction to data:

- 060071 Ammunition Supply Point
- 060014 Range Control Facility
- 060186 Light Demolition and Engineer Qualification Range
- 060190 Infantry Squad Battle Course (ISBC)
- 060082 MK19 / M203 Qualification Range
- 060050 Hand Grenade Qualification Course
- 060222 Field Latrine / Showers

## TRAINING SCHOOLS

The Regional Training Site-Maintenance (RTS-M) / Ordnance Training Battalion (OTB) is a specialty training school at Camp Roberts. The RTS-M tasking includes conduct of maintenance training for force modernization (FORCE MOD) equipment, such as the M1A1 Abrams tank and the Bradley Fighting Vehicle (BFV). In addition, the RTS-M conducts ordnance maintenance training (10 series) courses. Short-range improvements at this training school include improvement of security lighting and fencing. In addition, an ongoing program of barracks modernization and repair and warehouse construction is programmed to provide the RTS-M with needed support facilities.

- TBD Security Lighting and Fencing RTS-M, Main Garrison
- 89809 RTS-M Barracks
- 90001 RTS-M Barracks
- 90809 RTS-M Barracks
- 89911 RTS-M Additional Storage

## TRAINING SUPPORT FACILITIES

Two high-priority, short-range improvement projects specifically address training support facilities. Training support is needed to provide vehicle maintenance and troop dining capabilities for unit training at the major training area. The existing facilities are World War II vintage “woodies” that are far past their economic lifespan. The modernization of training capabilities are a high priority for the short-range plan. New training support capabilities programmed for Camp Roberts in support of this priority are as follows:

- 060268 OMS Modification / Alteration
- 060184 Consolidated Dining Facility

## FACILITY REDUCTION PROGRAM

Camp Roberts is undergoing an aggressive facility reduction program that is intended to reduce the expenditure of maintenance funding for unused or underutilized facilities. The facility reduction program is an ongoing initiative due for completion within the POM-cycle time frame. An added benefit of the facility reductions is that potential project sites are cleared so that future projects may be phased and developed in a highly flexible manner.

The demolitions are targeted within the main cantonment toward the majority of the 1000, 2000, and 7000 areas and a significant portion of the 3000 area.

The facility reduction program is phased as follows:

- Phase I 7000 Block
- Phase II 3100, 3200, 3300 Blocks

## MILCON PROJECT LISTING

The information discussed below was excerpted from the California Military Department Five-Year Capital Outlay Program, dated 1 July 1998, as presented to the California Legislature. The Capital Improvement Plan (CIP), as presented, specifically responds to the initiatives contained within *Vision 2020 – The California National Guard’s Long-Range Plan*. The following reports are provided as

supporting documentation to the information contained in this Real Property Development Plan report. Refer to VISION 2000 TAB™ for more detailed information.

## LONG-RANGE CONSTRUCTION PROGRAM (LRCP)

The LRCP includes major and minor military construction (MILCON) projects programmed for Federal Government funding. The LRCP data summarized below was taken from the LRCP dated 19 November 1997.

Table 2  
MILCON PROJECT LIST

Priority	Project #	Project	Fiscal Year	Cost (Fed) (\$000)	Program
05	060222	Field Latrine / Showers	99	400	Minor
14	060071	Ammunition Supply Point	00	6,383	Major
21	060014	Range Control Facility	01	1,250	Major
25	060186	Light Demolition and Engineer Qualification Range	01	700	Major
26	060190	Infantry Squad Battle Course (ISBC)	01	2,000	Major
70	060268	OMS Modification / Alteration	06	2,000	Major
TBD	TBD	Security Lighting and Fencing RTS-M, Main Garrison	00	351	Minor

## PROJECT INVENTORY AND EVALUATION REPORT (PIER)

The PIER is a consolidated list of all maintenance and repair projects that are programmed for a given installation. Essentially, the PIER represents the highest priority RPOM projects needed to maintain current installation capabilities.

Table 3  
CAMP ROBERTS PIER SUMMARY

Project Number	Type of Facility	Description	Estimated Cost (\$)	Remarks	AMSCO
